Unit 8 The Fish Quay
Sutton Harbour Fisheries
Plymouth
PL4 0LH

All of our huts are handmade by our team of time served craftsmen. Built using the finest quality and responsibly sourced materials for long lasting durability. A variety of materials can be used to achieve your desired finish.

Here at Harbourside Huts our team have a keen eye for recycling and repurposing materials. Not only does that reduce our impact on the environment but can create a beautiful and unique look to your hut.

Our huts can be built to any size and specification and tailored to suit your needs. Our team will work with you to design your dream hut from conception to completion.

As standard all of our huts are framed with responsibly sourced timber and fully insulated. They can be powered by environmentally friendly renewable energy sources or connected directly to mains services.

Working with our sister company JHR Construction we can offer a site survey and full installation service in preparation for the positioning of your hut.

Your hut can be tailored to a variety of uses

- Accommodation
- Home office
- Artist's studio
- Airbnb
- Playrooms

The possibilities are endless!

Our shepherd's huts are designed and built to truly reflect the original huts used by shepherds since the 15th century to tend to their flocks during lambing season.

Over recent years they have been transformed to provide a variety of uses, from holiday lets to an extra room for your house.

Traditionally on wheels, they need little or no planning permission and are a popular choice for those wishing to offer secluded holidays which makes them a great investment opportunity.

Please feel free to contact Rob or John to discuss your requirements, or even arrange a visit to our workshop.
